

PRESSURE GAUGE STAND

For controlled use of pressure gauges in packer and grouting systems

PRODUCT	TECHNICAL CLASS	KEY PARAMETER	CONFIGURATION
Pressure Gauge Stand	Pressure monitoring / mounting	Valve and connection line	Project-specific

1. PRODUCT DESCRIPTION

The Pressure Gauge Stand is auxiliary equipment used to connect pressure gauges neatly, clearly, and under control to packer and grouting systems. The connection and measurement configuration can be selected to suit the application.

2. TECHNICAL PARAMETERS

Parameter	Technical information
Product type	Pressure Gauge Stand
Primary function	Positioning the pressure gauge within the system
Connection	According to hose / valve / line connection
Control	Valved measurement and isolation arrangement
Pressure gauge range	According to the selected gauge
Body / dimensions	According to configuration
Custom manufacturing	According to connection and measurement arrangement

4. APPLICATIONS

01	Packer inflation systems
02	Grouting lines
03	Pressurized water tests
04	Permeability / Lugeon testing

5. TECHNICAL NOTES

- The gauge scale and maximum pressure should be selected for the application.
- Final connection and measurement dimensions should be confirmed before ordering.
